Impact Social Media Domain Name Purchasing

Link to Domain Name Purchasing: <http://impactsocialmedia.net/domains/purchasing/>

Description: Domain name purchasing will be required once you determine the name you want. There are many options for you to purchase domain names as there are many online suppliers. Nearly all online suppliers work on the do-it-yourself premises. Basically they sell you a domain name and then you are on your own. At Impact Social Media we don't just sell you a domain name but we include every last thing that goes along with it. This means we handle the purchase, setup, and ongoing maintenance all included in the purchase price. This includes name server DNS setup and changes, contact information setup and maintenance, auto-renew setup, locking setup and privacy setup.

I. Domain Name Purchasing Overview

1. Why use us?

There are countless choices for places to buy a domain name. The question is, "What makes Impact Social Media different and **why** should you use us?"

One thing that makes us very different is that we are **focused** on startup companies and small to medium sized businesses and organizations. We are keenly aware of your needs and concerns. This is why we go against the

industry standard by offering the **opposite** of a do-it-yourself domain purchasing approach.

We don't just sell you a domain name and then leave you to your own devices. Instead, we also take care of every last **detail** that goes along with it. We also offer **personalized** service as in a real live person that you can call up and talk to about anything that is on your mind.

When you purchase a domain name from us the first thing we do is take care of any and all of the **setup** needs. This means we will contact your hosting company to determine your name server **configuration** details. We then setup your name server entries and then do **testing** to make sure all is well. If you need website hosting we offer those services as well.

The next thing we do is to take care of all of your domain **contact** information. When we do this we also insert an **alternate** email address to our tech support department. This helps to **protect** you in the event you fail to get a notification email on something critical concerning your domain name.

The next thing we do is setup your domain **locking, auto-renew** setting and **privacy** settings. Once all of the setup is complete we are still here for you and will be at the ready should you have any questions, need assistance or wish to **change** your name server settings or contact information.

Also, we will keep tabs on your domain name and periodically **check** it to make sure that the domain locking, auto-renew and any other important items are all okay. Lastly, we will keep track of your domain name **expiration** and will contact you via telephone and email so what we can make sure your domain name does not expire.

Essentially, when you buy a domain name from us you are **also** getting complete domain management and tech support services. You could say we become the **babysitter** for your domain name and all of its needs! This means you can **concentrate** on running your business by delegating the responsibility of your domain name management to Impact Social Media.

2. What our price includes

As already mentioned, our pricing **includes** your domain name purchase **plus** many additional beneficial features. Most all of our clients have little to

no knowledge of all the processes required to **setup** and **manage** a domain name. Besides that, our clients are better served to focus their talents and energy on the task of running their business operation.

Take a look at what our domain name pricing includes:

- Your domain name purchase
- Determining your required DNS settings
- Setup of your DNS settings
- Testing of your DNS settings
- Setup of all your domain contact information
- Providing alternate email to protect you
- Setup of auto-renew feature
- Setup of domain locking feature
- Setup of domain privacy (if used)
- Quarterly checks to make sure everything is ok
- Online and/or telephone support
- Future DNS setting changes included
- Future contact information changes included
- We track your domain expiration and notify you
