Impact Social Media Web Hosting

Link to Impact Social Media Web Hosting: <http://impactsocialmedia.net/web-hosting/>

Description: Website hosting is a requirement for any website or application that will be seen by viewers of the World Wide Web. It can be a daunting task for a startup company, business owner or organization to decide which hosting company to use. This is because there are so many to choose from and they all have a wide variety of claims and offers. For that reason, we would like to have a moment of your time to introduce ourselves and the details of our web hosting. We are confident that once you become aware of our offerings you will find us to be one of the best web hosting options available to you anywhere.

♥ Impact Social Media = Eco - Friendly ♥

Eco-friendly **GREEN** web hosting

I. Why Impact?

- Professional and personalized service
- Our pricing = get more bangs for your buck
- Web hosting with ~~babysitting~~ websitting
- Focused on your unique needs
- Eco-friendly green web servers
- No length of term requirements
- Extensive features included

1. Professional and personalized service

We take pride in offering professional and **personalized** service. We are geared towards startup companies and small to medium sized businesses and organizations. This allows us to have a special focus on your unique needs.

When you host with us you will not be like a grain of sand on the beach. Instead, you will be given service as part of our **family** of hosting clients. We are well aware of the many available options to you and so we strive to give you a customer experience that will keep you hosting with us long-term.

2. Our pricing gives more bangs for your buck

We have done a great deal of industry research concerning the various pricing platforms that are available. The industry displays a very broad spectrum of pricing that ranges all the way from free to high-end expensive.

In the process of doing our research, we discovered that while there is a massive multitude of hosting providers, few of them are truly geared for the **unique** needs of startup companies and smaller sized businesses and organizations. This is because most hosting companies are focused on the do-it-yourself philosophy.

This can be great if you are looking for the lowest possible price and are already a webmaster and have the experience needed for such an undertaking. Problem is, **few** of the clients we focus on fit in this category. Most of them do not have the expertise to handle all of the tasks associated with **do-it-yourself** web hosting.

Our strategy gives you the most bang for your buck because we go against the grain of do-it-yourself hosting. Our hosting **includes** a full time babysitter or “websitter” for your hosted site! Let us explain our websitting.

3. Web hosting with babysitting - websitting

Our typical clients have little to no knowledge of things like directory security, DNS zones, DOS attacks, hot linking, name servers, robots.txt, suspicious activity, tar backups, traffic statistics, URL redirects, etc., etc.

Past that, our clients are **better** served to use their true talents to stay focused on the operations and success of their own business. This is precisely

why Impact Social Media has developed our unique hosting program that we call “**websitting**.”

Many people do not realize that a website cannot merely exist on a webserver with no monitoring, intervention or maintenance. Just like you cannot leave an infant without a **babysitter** you should also not abandon your website without a **websitter**.

In order to provide a **targeted** service that best fits the needs of our clients; we have developed a unique web hosting - websitting arrangement. We **include** the routine tasks, monitoring and ongoing maintenance of your website within your hosting fees.

Our hosting plan **includes** monitoring your website for 401 errors, suspicious and malicious activity, hot linking, DOS (denial of service) and other threats. Any detected problems or threats will be neutralized and you will be made aware of the details.

Our hosting also includes routine maintenance requirements for site **backups** and other items. If your site is static you will receive an emailed backup copy monthly. If your site is dynamic you will receive an emailed backup copy daily, weekly or bi-weekly depending on the frequency of your changes.

Last but not least, our hosting includes a monthly **IMPACT** report. The **IMPACT** report will be emailed to you and will give you a very detailed representation of the traffic **statistics and data** at your website. This will help you to see what is going on with your traffic and will also aid you in making decisions to improve your site.

4. Focused on your unique needs

Impact Social Media is focused on startup companies and small to medium sized businesses and organizations. We have our **roots** in entrepreneurial ventures and we are intimately familiar with the unique concerns and needs of these particular groups.

This makes us uniquely qualified to **cater** to your specific needs. Our strategies and methodologies are formed within a framework that encompasses everything that is most important to you. Truth is, we have a lot in common with you and this gives us special insight.

5. Eco-friendly green web hosting

Another benefit of hosting with us is that you are using eco-friendly green web servers. A typical server produces just about the same emissions as a 15mpg SUV! Because we care about the **environment** we offset this by using web servers that are **130%** wind powered. We think locally and we act globally. Our [environment](#) is important now and for future generations.

6. No length of term requirements

We feel that the best way to keep you onboard is with superior service instead of binding you in with **contracts** and fine print. We also realize that things change and for whatever reason it may be in your best interest to move or terminate your hosting. It is our desire that you are **free** to do this with no contractual obligations as your best interests are our top priority.

7. Extensive amount of features are included

Our feature packed hosting does not just include hosting, websitting and green servers. It also includes an overwhelming quantity of impressive **features**. All of these additional features are provided to ensure that your hosting will provide you with **anything** you could possibly need.

Our [many features](#) are also geared to your specific needs. Many of them are especially suited for startup companies and small to medium sized businesses. For instance, our [online video tutorials](#), mailing lists, auto-email forwarders, auto-email responses, website templates, QuickInstall and Fantastico Deluxe are all **focused** directly on your needs.

We can host just about any type of website or website platform you can think of. Please take a look at the extensive listing of [website types](#) and [website platforms](#) that we accommodate. Also, be sure to take a look at the complete **itemized** listing of our many hosting features that will be shown in [section IV](#).

8. We give back to the community

We are passionate about doing what we can to give back to our **community**. We offer free services to 501c3's for the purpose of aiding humanitarian causes. We also offer free services to those in need of economic empowerment.

We have also created the [Impact Education Program](#). This program allows college students to have a **free** web hosting account. This account gives them complete use of a full blown web server with all of the bells and whistles.

The Impact Education Program enables college students to experiment, learn and propel their **education** at no cost to them. We also allow them to continue with the arrangement after graduation. This allows them to hone their skills, display resumes and to show off examples of their work when seeking employment.

In summary, we would like to challenge you to closely examine all of the **features** and **benefits** that are included with our hosting. We are very confident that you will be hard pressed to find a competitor who offers this many features with websitting included. The purpose of so many features is to give you more bangs for your buck as well as a greater deal of flexibility.

Now we would like you to take a minute to look over the **types** of websites and website **platforms** that we host. Also, take some time to look closely at our entire included web hosting **features**.
